

## A review of new features and enhancements April 5, 2022

To see bug fixes and enjoy the convenience of hyperlinks to related topics in the Online Reference Guide, view this in the ACEware Forum <https://www.aceware.com/forum/>

### Student Manager New Features:

108 – Released Monday, February 7

- Hybrid and Certificate Date have been added to the course Student List (from the Course Screen)
- You can now add the Generate Catalog Copy report to Favorite Reports
- Add the COLOGFIRST field to the course ACEweb Info tab, for use with Express Registration templates or other custom routines. Your users must log into their Name Account before they can view the course status page.
- A Hybrid Name Roster report has been added to [Student Manager Reports web site](#). It can be used for Hybrid type courses to sort students by Physical/Virtual attendees.
- You can now use up to 3 characters for ID prefixes, as set on Edit>Preferences>Org Defaults tab
- Added a Member Code Drop Down list to the Mass Change/Update/Delete/Archive tool.

109 –Released March 7

- Added additional registration and registration UDF fields to the Workshop Roster report area
- The registration table's RGTOTALPD will now be marked as True when a registration is full paid, and the paid designation will be shown on the Registration record (under the Balance Due value).
- The Limit Member Discounts optional module has been updated to show the Max number of discounts the registrant can receive, and the Remaining discounts left on the Membership registration. To support this, the RGCLASMAX field has been added to the Register table
- Added oAuth Authentication support for the Office 365 SMTP server. This feature requires updated Mailkit files AND registering the application.

110- Released April 5

- Updated Email routine to send the user's email credentials if your Email server requires it. This requires you to enter your email address and password on Edit>My User Profile
- Updated the XFRX PDF Writer. This feature requires updated SFRX files, located on our Tools website
- Updated the Courses Taken list to include the Registration Fee Description
- Updated permissions for Catalog records to allow adding but not editing if Course Level (on user's Password Maintenance record) is 2.
- Updated the Export to XLSX format tool to run faster when exporting a large number of records.
- Updated the Transfer Payment tool to remove the note about needing the name ID or course Code since they are no longer needed when transferring payments.
- Lengthened the Fee Description display on course Fees tab, course fees Show All, and Registration record Fee to accommodate the longer Fee Descriptions.

## ACEweb .068 – Released March 8

- Added new options for custom Course Information table listing
- Added OAuth Authentication support for the Office365 SMTP server. This feature requires updated Mailkit files AND registering the application. Contact your ACEware technician for more information.
- Updated the AsyncLink INI setting to limit the courses listed.
- The Limit Member Discounts optional module has been updated to support the RGCLASMAX field.
- New: AdmLogonAttrib INI setting to add attributes to the Administration Log On password field (e.g., autocomplete="off").
- Updated the StateList.dbf table to include new countries and an International option for the State list.

You can get email notification for all updates released for Student Manager and ACEweb. Instructions for this are in the Forum!
